42" leader
 12# Berkley Line

Mini Walleye Spins

The Mini Walleye Spins evolution started years ago on Mille Lacs Lake in Minnesota. I was in a tournament and found the walleyes to be very finicky. The bait of choice was a plain hook and crawler on a 12' leader. The fish kept dropping it and just would not commit. I tried the traditional crawler harness and could not get a bite at all.

I down sized to a very small spinner and threaded the crawler on it. That was the ticket; they just wanted a tiny bit of flash and the crawler to look natural.

These can be used with minnows and leeches also.

Give it a try. I know it will put more fish in the boat!

Design

I have developed 10 different patterns that consistently catch walleyes under most conditions.

I have designed them using 42" of Berkley monofilament line and top quality VMC Aberdeen hooks. The bead size and shape allow the spinner to operate freely at surprisingly low speeds. The Aberdeen style hook pulls free of most snags without breaking the line.

Hook 'N Beads

Hook 'N Bead is the basic lure to use when you are fishing very clear water. It will entice the walleyes that are belly to the bottom.

It also presents the live bait as natural as possible.

Fish it with a minnow, leech, or crawler.

Flasher Walleye Spins

42" leader
12# Berkley Line

The larger Flasher Walleye Spins should be used in stained water where the fish need more of a vibration and flash to provoke them into striking. They need to be fished at .9 to 1.4 mph to get them to spin properly. Tip with leech, minnow, or thread a crawler on the hook.

Death Spins

The only difference between these and our straight hook products is the use of a Slow Death Mustad hook.

These hooks rotate the bait and give a tantalizing appeal to the lure.

It can be used with crawlers, minnows, or leeches, although ½ of a crawler works the best on these hooks.

Flashing Death

The only difference between these and our straight hook products is the use of a Slow Death Mustad hook. These hooks rotate the bait and give a tantalizing appeal to the lure.

It can be used with crawlers, minnows, or leeches, although ½ of a crawler works the best on these hooks.

42" leader
 12# Berkley Line

Float 'N Fathead

Float 'N Fatheads work the best when the walleyes are cruising through and just off the bottom.

They are also virtually snag-free when fishing a very rocky area.

The 42 inch of monofilament line will allow it to be above the bottom 18 to 22 inches.

Tipped with a minnow, leech, or ½ crawler is deadly.

Two Hook Flasher Spin

We start using these when water is at least
65 degrees.

Fish these fast from 1.4 to 2.2 mph!

Use the 2 hooks on a crawler and just 1 hook
for minnow or leech. Let the back hook
hang free.

Crank Bait Spinner

ITEM	COLOR	ITEM #
Crank Bait Spinner	hammered brass	DH034-01
Crank Bait Spinner	hammered silver	DH034-02
Crank Bait Spinner	hammered copper	DH034-03

42" leader
 12# Berkley Line

Crank Bait Spinner

This rig will add flash to your crank bait
when trolled on lead core.

Works super good in stained water.

Add this above your plug and tie to your
leader.
